

High Load Move Request Form

PLEASE READ PRIOR TO COMPLETION OF THE FORM:

PRECorp's practice is to review the routes of all loads greater than 18.5 ft in height to determine whether the load needs to be escorted. *Loads greater than 21 feet in height are prohibited and will not be moved inside PRECorp's service territory.*

- PRECorp may require a deposit for loads over 18.5 feet due to the amount of resources needed to accommodate loads of this size moving through PRECorp's service territory. In this case, PRECorp would provide an invoice for the required deposit.
- The deposit must be received before a PRECorp crew could escort the high load. If an escort is required, the applicant will be billed for the crew and equipment used.
- The applicant requesting to move the load must complete this High Load Move Request Form.
- Notification is required at least 48 hours prior to the requested move date.
- PRECorp will determine service crew availability upon receiving each request.
