Sundance to have 2019-2020 line work in town

The Powder River Energy members in Sundance will see power line construction activity this summer, and some planned outages as contractors rebuild sections of the electrical infrastructure in town.

PRECorp engineers have been working with members for the past several months ironing out the pre-construction details. Schulte TA is the project contractor. Workers will replace aging infrastructure through the alleys

all over town. The infrastructure update will carry modern construction standards of reliability and serving future demand. Some existing underground wire will also be replaced.

The 2019 work will cover the area of Sundance north of alley south of Cleveland Street, plus the Sundance Country Club, Crook County Fairgrounds, and Sundance school buildings.

Next year, work will generally in-

volve the area south of Cleveland Street.

Members will be contacted 48 hours prior to any planned outages. If you have an outage that lasts longer than we promised, call:
